MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

Real Gold Mining Limited (the “Company”) and its subsidiaries (together, the “Group” or “We”) specialize in the mining of gold and the processing of ore into concentrates containing gold and other minerals for subsequent sale. The Group has two gold mines in operation in the Chifeng Municipality, Inner Mongolia, namely, Shirengou Gold Mine and Nantaizi Gold Mine. They are adjacent to each other, and the ore processing facility located at Nantaizi Gold Mine (“Shirengou-Nantaizi Processing Plant”) processes ore from both Nantaizi Gold Mine and Shirengou Gold Mine. Luotuochang Gold Mine, another gold mine of the Group which is also located in the Chifeng Municipality, Inner Mongolia, was in operation until the board of directors (the “Board”) decided in July 2014 to suspend its mining activities. The ore processing facility located at Luotuochang Gold Mine (“Luotuochang Processing Plant”) processed ore from Luotuochang Gold Mine when it was in operation.

MANAGEMENT DISCUSSION AND ANALYSIS (CONTINUED)

OPERATIONAL CONDITIONS OF THE SHIRENGOU-NANTAIZI PROCESSING PLANT

The total amount of ore processed for the six months ended 30 June 2013 was approximately 127,100 tonnes, representing a decrease of approximately 39% from the same period of 2012.

The average gold grade for the six months ended 30 June 2013 was approximately 2.5 grams per tonne, and the average recovery rate was around 71.9%.

The total production of payable gold and equivalent gold for the six months ended 30 June 2013 was approximately 7,200 ounces and 9,000 ounces respectively, representing a decrease of approximately 75% and 75% respectively from the same period of 2012.

The decrease in the total production of payable gold in Shirengou-Nantaizi Processing Plant was mainly due to the following factors:

- (a) Decrease in average gold grade caused by the reasons below:
 - (i) Increase in dilution. As the mining depth deepened, ore-control fault structures changed, which resulted in more heavily fracturing ore bodies and instability of the hanging wall. Therefore, ores were easily mixed with a large number of country rocks at the time of mining, which led to the decrease of ore grade.
 - (ii) Decrease of geological grade in some parts of the ore bodies. It was verified that in the deeper area of the ore drift, geological grade in some parts of the ore bodies decreased, and in turn the ore grade also decreased.
- (b) Decrease in average recovery rate owing to lower grade of raw ores.
- (c) Less quantity of ores was processed owing to the mining halt at Shirengou Gold Mine as a result of an electricity outage during the period from October 2012 until June 2013 relating to a revamp project implemented by the local electricity authority.

The decrease in the total production of equivalent gold in Shirengou-Nantaizi Processing Plant was mainly due to the decrease in the total production of payable gold which formed part of the total production of equivalent gold, coupled with the decrease in the production of other metals.

OPERATIONAL CONDITIONS OF THE LUOTUOCHANG PROCESSING PLANT

The total amount of ore processed for the six months ended 30 June 2013 was approximately 145,800 tonnes, representing a decrease of approximately 2% from the same period of 2012.

The average gold grade for the six months ended 30 June 2013 was approximately 1.5 grams per tonne, and the average recovery rate was approximately 77.5%.

The total production of payable gold and equivalent gold for the six months ended 30 June 2013 was approximately 5,600 ounces and 9,300 ounces respectively, representing a decrease of approximately 45% and 48% respectively from the same period of 2012.

MANAGEMENT DISCUSSION AND ANALYSIS (CONTINUED)

The decrease in the total production of payable gold in Luotuochang Processing Plant was mainly due to the following factors:

- (a) Decrease in average gold grade.
- (b) Decrease in average recovery rate owing to lower grade of raw ores.

The decrease in the total production of equivalent gold in Luotuochang Processing Plant was mainly due to the decrease in the total production of payable gold which formed part of the total production of equivalent gold, coupled with the decrease in the production of other metals.

Overall, the Company produced approximately 12,800 ounces of payable gold and approximately 18,300 ounces of equivalent gold for the six months ended 30 June 2013, representing a decrease of approximately 67% and 66% respectively from the same period of 2012.

As announced in the Company's announcement dated 19 August 2014, the Board has decided in July 2014 to suspend the mining activities at Luotuochang Gold Mine and the operation of Luotuochang Processing Plant. The mining activities at Luotuochang Gold Mine and the operation of Luotuochang Processing Plant remain suspended as at the date of this interim report.

UPDATE ON THE ACTIVITIES AT THE OTHER GOLD MINES OF THE GROUP

As at the date of this interim report, the Company also owns 70% of the equity interest in Gaotaizi Gold Mine in Inner Mongolia. As mentioned in the Company's announcement dated 6 May 2015, Chifeng Fuqiao Mining Co. Limited* ("Chifeng Fuqiao") (赤峰富橋礦業有限公司), being a subsidiary indirectly held and wholly owned by the Company, has in the first quarter of 2015 acquired 70% of the equity interest of Inner Mongolia Siziwangqi Gaotai Mining Company Limited* ("Gaotai Mining") (內蒙古四子王旗高台礦業有限責任公司), which owns Gaotaizi Gold Mine. There is currently no production at the Gaotaizi Gold Mine. The Company is carrying out exploration activities in the deeper and the outer parts of the mine in preparation for expansion of production capacity in the future.

As at the date of this interim report, the Company also owns Yandan Gold Mine, Yantang Gold Mine and nine other smaller gold mines in Guangxi. The Company is still in the process of applying for the mining permits for Yandan Gold Mine in Guangxi in accordance with the requisite procedure. For Yantang Gold Mine and two smaller gold mines in Guangxi, some ore reserves have been indicated by geological surveys. Relevant work is being carried out before the Company starts to apply for the mining permits.

The Company will consider abandoning the remaining seven smaller gold mines in Guangxi in due course and will make announcement in this regard as and when required.

FINANCIAL REVIEW

Revenue

The unaudited revenue of the Group decreased from approximately RMB451.2 million for the six months ended 30 June 2012 to approximately RMB130.5 million for the same period of 2013. The decrease was mainly due to less quantity of ores processed, the decreases in the average prices of gold, gold grade, as well as average recovery rate.

Cost of sales

Cost of sales was approximately RMB183.8 million for the six months ended 30 June 2013, decreased from approximately RMB210.3 million for the same period of 2012. Cost of sales primarily included cost of raw materials consumed, subcontracting fees, auxiliary material costs, electricity costs, depreciation and amortization, environmental protection fees and production safety fees. For the six months ended 30 June 2013, our cost of sales accounted for approximately 140.8% of our total revenue, increasing from approximately 46.6% for the same period of 2012, owing to the significant decrease of revenue.

Gross loss/profit and gross margin

As a result of the foregoing, gross loss was approximately RMB53.3 million and gross margin was approximately -40.8% for the six months ended 30 June 2013. For the six months ended 30 June 2012, gross profit was approximately RMB240.9 million and gross margin was approximately 53.4%.

The government subsidies were in the form of a benefit from tax concession granted to us by the government of the People's Republic of China (the "PRC") to encourage the development of the gold industry. The decrease in government subsidies was due to the decrease in revenue.

Administrative expenses

Administrative expenses decreased from approximately RMB44.3 million for the six months ended 30 June 2012 to approximately RMB28.2 million for the same period of 2013.

The Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited require the preparation of a report on interim financial information to be in compliance with the relevant provisions thereof and International Accounting Standard 34 "Interim Financial Reporting" ("IAS 34") issued by the International Accounting Standards Board. The directors are responsible for the preparation and presentation of this interim financial information in accordance with IAS 34. Our responsibility is to express a conclusion on this interim financial information based on our review and to report our conclusion solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

SCOPE OF REVIEW

We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" issued by the Hong Kong Institute of Certified Public Accountants. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

CONCLUSION

Based on our review, nothing has come to our attention that causes us to believe that the interim financial information is not prepared, in all material respects, in accordance with IAS 34.

2. ADOPTION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS

In the interim period, the Group has adopted all the new and revised International Financial Reporting Standards ("IFRSs") issued by the International Accounting Standards Board that are relevant to its operations and effective for its accounting period beginning on 1 January 2013. The adoption of these new and revised IFRSs did not result in significant changes to the Group's accounting policies, presentation of the Group's condensed consolidated financial statements and amounts reported for the current period and prior periods except as stated below.

Amendments to IAS 1 "Presentation of Financial Statements"

Amendments to IAS 1 titled Presentation of Items of Other Comprehensive Income introduce new terminology for statement of comprehensive income and income statement. Under the amendments to IAS 1, a statement of comprehensive income is renamed as a statement of profit or loss and other comprehensive income and an income statement is renamed as a statement of profit or loss. The amendments to IAS 1 retain the option to present profit or loss and other comprehensive income in either a single statement or in two separate but consecutive statements.

The amendments to IAS 1 require additional disclosures to be made in the other comprehensive section such that items of other comprehensive income are grouped into two categories: (a) items that will not be reclassified subsequently to profit or loss; and (b) items that may be reclassified subsequently to profit or loss when specific conditions are met. Income tax on items of other comprehensive income is required to be allocated on the same basis.

2. ADOPTION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (Continued)

Amendments to IAS 1 “Presentation of Financial Statements” (Continued)

The amendments have been applied retrospectively, and hence the presentation of items of other comprehensive income has been modified to reflect the change. Other than the above mentioned presentation changes, the application of the amendments to IAS 1 does not result in any impact on profit or loss, other comprehensive income and total comprehensive income.

The Group has not applied the new and revised IFRSs that have been issued but are not yet effective. The Group has already commenced an assessment of the impact of these new and revised IFRSs but is not yet in a position to state whether these new and revised IFRSs would have a material impact on its results of operations and financial position.

3. SEGMENT INFORMATION

The Group has 3 operating mines in Nantaizi, Shirengou and Luotuochang in Inner Mongolia, the PRC. The Group is organised based on the locations of its ore processing plants. The ore processing plant located at Nantaizi processes ore from the mines in Nantaizi and Shirengou. The ore processing plant located at Luotuochang only processes ore from the mine in Luotuochang. For management reporting purpose, the Group’s executive directors, who are the chief operating decision maker (“CODM”), reviewed the financial information of each ore processing plant for the purpose of resources allocation and performance evaluation. Hence, the processing activities at each of the ore processing plants in Nantaizi and Luotuochang represented as an operating segment.

The Group acquired certain subsidiaries engaged in exploration activities in Yunnan and Guangxi, the PRC. The CODM also reviewed financial information of each subsidiary separately. Because all these subsidiaries carry out exploration activities, they are aggregated as one reportable segment of exploration of gold mines.

The Group’s reportable segments are set out as follows:

- (i) Ore processing plant in Nantaizi — the mining and ore processing activities in respect of the mines in Nantaizi and Shirengou;
- (ii) Ore processing plant in Luotuochang — the mining and ore processing activities in respect of the mine in Luotuochang;
- (iii) Exploration of gold mines — the exploration activities in various places.
